Romantic Cartoons 2009 Alpha And Omega

Director Duncan Jones (Source Code, Warcraft) is working on another film set in the same universe as Moon, called Mute, which will also have scifi elements though it'll be set on Earth this time; eventually, he hopes to do a third and make it a trilogy.. Rhoda makes another terrible mistake when she first tries to set things right, seeking out John but failing to tell him who she really is.. Things soon get very, very surreal when it becomes apparent that everything is not what it seems, especially not Ethan and Sophie, who become entangled in their very unconventional therapy session..
